ASCLEPIAS INCARNATA (SWAMP MILKWEED) VARIETY

GROWING MILKWEED

1. Plant with approximately 1/4 in. of soil covering.
2. Keep the soil moist and store in area of warmth and sunlight.
3. Seeds will start germinating in 14-21 days if kept above 70 degrees F.
4. Plants are ready to transplant when they are 3-6 in. tall. Find a sunny area to transplant and keep seedlings watered.
